Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Penny Cragun

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Hobert Richardson

Re: WC Docket No. 14-28 Comments

A free and open Internet is critical to maintain the value of the internet as we know it today. I hope the FCC will reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. Please also reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Michael and Evie Rapport

In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. While it may not happen immediately, traffic prioritization will eventually result in traffic that gets through (high priority/fast lane) and traffic that doesn't (low priority/slow lane). Bad enough that such an infrastructure should be differentiated economically, but that same structure also has the potential to be differentiated politically, and that is unacceptable.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

richard gunn

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Gary A Smoke

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Marcus stephens

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. Also, the businesses who would profit from such a venture should stop being so damn greedy - for instance, Comcast has a market capitalization of 65.67 Billion. Adding internet charges is just another excuse to gouge the consumer and small businesses to make more money.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

James Gorman

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Kitty Chen

Re: WC Docket No. 14-28 Comments

Net Neutrality is important because the Internet is an essential service Americans rely on to conduct our most basic daily affairs, from applying for a job to finding a home, to running a small business. And our right to communicate freely and be heard lies at the heart of our ability to participate equally in our democracy. Do not allow those that "own" the telecommunications pipelines to control the price and content of what the public communicates.

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Mark Norris

In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. We are already under the thumb of corporations when it comes to our rights, our jobs and our safety. Free and neutral internet is our only way to communicate with others who wish to seek change. This is likely the real reason they want to stop free and neutral usage of the net.

Sincerely,

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Debra Carlson

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Jennifer Collins

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Amber MacPherson

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Chris Caron

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Bruce Assardo

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Rosemary Barron

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Mary Schulze

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Mark Scardello

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Sandra Pelletier

445 12th Street, SW
Washington, DC 20554

Re: WC Docket No. 14-28 Comments

The FCC should forcefully reject the rule proposal that would abolish net neutrality. Internet service should clearly be classified as a telecommunications common carrier to maintain its egalitarian promise.

Sincerely,

Mark Darling
214 S Bridge Apt 4
Grand Ledge, MI 48837-1589

Chairman Tom Wheeler

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Jeanne Shaw

Re: WC Docket No. 14-28 Comments

I rely on the internet for much of the daily research I conduct. I use it for everything from looking up a business phone number to understanding the tests and medications my doctor has prescribed to deciding on which cell phone my Mom would like best. If that information is controlled by a business for profit, I will not get the important information that I need. In the time that I need it. As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Douglas Mirell

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Brad Robert brouillette

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Robert Johnson

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Amy Landsman

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Ken Pitts

Re: WC Docket No. 14-28 Comments

Don't be duped by corporate greedsters! The Internet must remain free and open, and the FCC must reclassify broadband Internet access as a telecommunications service. The FCC must also reject proposals that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. Such laws can only doom the general population to eternal increases for ever stingier avenues of access; e.g., \$14.95 a month for a pathetic 2 mbps, or in my case, the hovering threat of \$46 for ATT's 6 mpbs -- an absolutely egregious charge on a \$1050 monthly Social Security budget. Wake up, FCC. And why the hell don't we have an FCC Chairman who cares about the general public! How in hell did Tom Wheeler get the job! And hell is the word for what he represents: not people but corporations. Makes me sick, especially when I look at my massively increasing internet bill, the only form of access I will soon no longer be able to afford -- and all because corporate puppets like Tom Wheeler are in charge. Good gawd, how could Obama betray us in this way.

Sincerely,

Keith Fahey

Re: WC Docket No. 14-28 Comments

There are some things that must remain in the public commons. The internet, the radio waves. All of these insure that we don't degrade into a something reminiscent of the Dark Ages. I wish I was being mellow-dramatic. As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Re: WC Docket No. 14-28 Comments

I am saddened that I even have to write this letter. I am shocked that the FCC is actually considering eliminating Net Neutrality, thereby allowing corporations and wealthy individuals more and better Internet access than other users. The United States is a country that was founded on the principal that all men are created equal, and yet the reality in so many instances is that this is not the case. However, Net Neutrality upholds this principal, allowing equal and open access to all users. In the Information Age, it is crucial that we reclassify broadband internet access as a telecommunications service and preserve Net Neutrality. Those with more money should not have preferential (faster) treatment on the internet, thereby discriminating against the majority of users. Knowledge and access to it is the great equalizer among United States citizens. Please don't drive yet another wedge between the haves and have nots in this country.

Sincerely,

Amy Gulick

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Cathy Hathaway

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. Reclassification is the only way to preserve the internet as an equal and open platform for all. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. Our democracy is being eroded and destroyed by money at every turn, please don't let the Internet fall to corporate takeover too. If you care about democracy, you'll reclassify the Internet as a public utility and enforce strong Net Neutrality regulations.

Re: WC Docket No. 14-28 Comments

Protect Net neutrality, reject the so called "fast lanes" and require ISPs to treat all traffic equally!
Further, require ISPs to advertise their ACTUAL SPEEDS rather than overselling bandwidth and under-delivering. Protect the net. Break up Internet monopolies, once and for all.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Donna M Boguslav

Re: WC Docket No. 14-28 Comments

Letting the Internet evolve as it has, has facilitated a world wide revolution in democratic freedom and economic prosperity expansion. Do not tamper with this success story. The U.S. Constitution guarantees the masses the Right To Free Speech and Equal Access Under the Law. I should have the same Right Of Access to the Internet, including broadband, as any other entity and as I have with my telephone/telecommunications Right to Free Speech. The U.S. Constitution gives you no other choice but to reclassify broadband Internet as a PUBLIC UTILITY - just like the telephone, water, sewage, electricity, rights of the masses. As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. This is an UNCONSTITUTIONAL INFRINGEMENT on the PUBLIC'S/MASSES/INDIVIDUAL'S RIGHT TO EQUAL ACCESS and FREE SPEECH.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Martha Wenstrand

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Trent Keller

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. This is a taxpayer program. Don't give it away. We let the world use it and we are attacked. Do not give it to corporations! In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Richard Carrube

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Richard B Anderson

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. No special favors for the rich!

Sincerely,

Marie Leven

Re: WC Docket No. 14-28 Comments

The internet should remain equally accessible to corporations and the people. Should the "Fast lanes" be reserved for corporations and limit the use, speed or available time for the people, then it is unjust and elitist. As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Mark Egan McCarthy

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Mark Verkhovski

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Jenny L. WolffWood

Re: WC Docket No. 14-28 Comments

It is vitally important that the FCC protect net neutrality. Corporations should not get the priority, relegating your average user to slower connections, just because they can spend more. The internet should be classified as a public utility.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

N Henning

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Susan Adelizzi

In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. I know that many of you getting these comments are taking money from those who oppose net neutrality and it would seem that we are barking up the wrong tree. I am reminded of Teddy Roosevelt, who, after being hand picked by big money, big boss machine politics, upon election returned to trust busting actions for the common good. He was then too popular to be controlled by the big shots. He's on Mt. Rushmore, where will your career be in ten years?

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Jane M. Husman

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Clara Piecuch

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Patricia Soteropoulos

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Colleen cuntz

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Helen Van Hoozer

Re: WC Docket No. 14-28 Comments

The Internet IS a vital public utility. It has become the nervous system of our civilization enabling unprecedented levels of intercommunication. Handing even more control over the Internet to corporations is tantamount to cutting our tongues off and sealing our ears. FCC commissioners, LOGIC and DECENCY tell us handing over more control is wrong, I hope you have at least one if not both. As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Scott Blaydes

Re: WC Docket No. 14-28 Comments

There is no need for this. How will giving already privileged groups, an even greater advantage, allow our society to continue to be an innovator? As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

margaret monbureau

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Re: WC Docket No. 14-28 Comments

I am a small business owner whose tech start-up relies solely on our current free and open Internet, if the FCC does not perform it's duty, my company will die and my 20 well-paid employees will be laid off. I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality and countless thousands of smal businesses around the world. The FCC *must* also reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. That will specifically kill my business just as it's getting started. Side with the American People, and not anti-patriotic corporations whose greed pushes them to take the Internet away from everyone else.

Sincerely,

Robin grant

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Debrah L Denemark

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Joan Freeman

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Larry Meyers

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Margaret Lamb

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Robert Winkler

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Claudia Martinez

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Mark Terpstra

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. The causal giving away of public resources to moneyed interests has trammled the U.S.'s pursuit of better standing among the world's developed nations for decades. You can take another step down that road to business-enforced mediocrity, or you can support the real national interest, and the public interest, as is your mandate. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Joseph Shay

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Chuck Massoud-Tastor

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Maxx Patterson

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. The internet was created as a free medium and should stay that way. It's time the government serve the people, not corporate America. Net neutrality puts us all on equal footing, which is as it was intended to be, and should be. The Republicans in Congress have done enough damage to individuals in fostering corporate interests above individuals. It's time to serve the people, as the government is supposed to do.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Charles R. McGuire

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Chip James

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Re: WC Docket No. 14-28 Comments

I can live without the net if becomes a public supported utility to make the rich richer and their voice more dominant, Why should I pay for their propaganda to get there faster. Why do I pay more taxes to let them have better roads to ship their products, Military to fight wars for them and now a Democrat wanting to give the powerful monopolies even more power, If you destroy net neutrality I am leaving the web because you will have squashed my voice. It is amazing that I donated money to republicans masquerading as Dems.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Justin Hannington

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Steve Bartholow

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Steven Rhodes

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Stephen Sutton

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Jordan McClung

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Jaye Bergen

Re: WC Docket No. 14-28 Comments

Access to broad band internet is increasingly being controlled by fewer and more powerful corporations. This in and of itself represents a failure of the FCC. The FCC should be representing the interests of all the people; it should not be acting to benefit large corporations. Corporations whose primary interest is profit and who have little to no real competition do not operate in the interests of the people. Recently, content providers like Netflix and YouTube have come forward to point out just how detrimental this control by ISPs has become, and how users and providers of content are harmed by the control wielded by the ISPs. The recent agreements that Netflix was essentially forced to make with ISPs in order to continue being able to provide useful content to its customers illustrates how corrupt the system has become. And yet, the FCC has proposed "fast lane" rules that would only exacerbate the problem. There should be no premium priced fast lanes; they are anathema to an open and equitable internet that would serve the public interest. In my view, the FCC should change course, not only rejecting fast lane rules but prohibiting the strong-arm tactics of ISPs that result in situations like the Netflix case. Further, the FCC should reclassify broadband Internet access as a telecommunications service so that the interests of the people can be more effectively served. As an example of just how powerful the ISPs have become, here in North Carolina the ISPs successfully lobbied the state legislature to prohibit municipalities from providing broad-band internet service to their citizens, even in rural areas where the ISPs have refused to provide service. ISPs have repeatedly demonstrated that they do not, and do not intend to, act in the public interest. It is the responsibility of the FCC to act for us. The FCC should not be taking actions, such as the fast lane rules, that will only increase the power and profits of the ISPs, while further harming internet users and content providers. Our country, its citizens, and businesses, both now and in the coming years and decades, will best benefit from an open, equitable, and affordably accessible high-speed internet. The FCC should be acting to ensure that benefit. The FCC should not be working to benefit the ISPs.

Sincerely,

David Houck

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Jesse Browner-Hamlin

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Katia Scaglia

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. Being poor I can barely afford internet now. Books, newspapers, libraries, catalogs & mag's on paper are fast becoming obsolete antiques. With no internet I may as well be illiterate. And leaving Rich Co.'s in charge would be like letting them control what goes on TV & into all newspapers.
Thank You, EMcK

Re: WC Docket No. 14-28 Comments

I do not clearly understand what the proposed rules would do, but I know that money has always bought privilege. The one exception in our democracy has always been voices. Everyone has an equal right to be heard, not perfectly or all the time, but heard. If the proposed rules do indeed set up a fast lane for big business, wealth and politics, and a slow lane for the rest of us, don't allow it! As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

ronald season

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Alene Shaul

In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. I am a real print journalist and Vietnam War veteran, one of seven billion humans who depend on an unadulterated internet to improve their lives and chance of survival. YOU who SUCK corporations for a LIVING have no right to rape information conduit any more than you have a right to melt little girls for hydrocarbon contracts while your benefactors terrorize the Mideast like "burning coloreds off their delta land." I really do not think you fathom the consequences of your dictatorial actions but rest assured for every action; there is an equal and opposite reaction. As Dick Gregory told Kent State the first week of May 1970; telling America how good your teeth look when you have a brain tumor won't help you."

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Alan Townsend

Re: WC Docket No. 14-28 Comments

It is dazzlingly obvious that the internet is a vital resource that serves many purposes. The most crucial is that of telecommunications service. Therefore, the internet should be classified as a common carrier and afforded those protections. The net effect (pardon the pun) would be to preserve Net Neutrality. The FCC is the ONLY institution that is charged with protecting the interests of THE PEOPLE!! The corporations have more than enough power and resources to take care of themselves. Our government should prevent the corporations from making all the rules.

Sincerely,

Jon Stubbs

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Richard Martin

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Jill Meyer

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. Currently, the Internet is used by everyone, from individuals, to large corporations, from small businesses to non-profits. It is this wide-spread use that makes the internet vibrant and important. If the internet is allowed to be split into fast lanes for large corporations who can afford to pay, and slow lanes for everyone else, it will lose that vitality, and will stagnate. Public discourse will suffer. Business (especially small business, which constitutes the largest -- and most innovative -- sector of our economy) will suffer. This would be a huge blow to the United States. You cannot allow this to happen. Do the right thing -- preserve Net Neutrality! Thank you.

Sincerely,

R Karpinski

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Catherine Blunt

In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. One thing is certain; I shouldn't even have to be protesting this. The FCC is a US government regulatory department. Like in "We the People"??? You're there to protect what WE see as our best interests. Not what the corporations see as their's, or to treat the People like children who don't know what's good for them... Now get on with it.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

kevin slauson

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Maureen Mayer

Re: WC Docket No. 14-28 Comments

Here in the richest nation, we have the worst Internet service and pay the highest price. Ergo, corps already have too much control over our ability to communicate and educate via the Internet. We also have corp control of our government, likely the reason you would even consider further screwing Americans for corporate control. We the people would appreciate it if you would remember that we pay your salaries. Corporations buy corruptible souls. As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

james balder

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Barbara Nagy

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Gregory Lepore

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Henry Martinez

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us, especially since we've already been adversely affected over the past decade by long-delayed email deliveries even when we have paid extra for small-business email and website hosting services. The FCC MUST reclassify the Internet (viz., broadband communications) as a public utility IMMEDIATELY. WHY? Because the Internet IS a VITAL public utility (like water, gas, and electricity). The Internet IS an essential public utility on which Americans rely to conduct our most basic daily affairs, from applying for a job to finding a home, to running a small business. And our right to communicate freely and be heard lies at the heart of our ability to participate equally in our democracy. The only way to preserve the open Internet and TRUE Net Neutrality is to reclassify the Internet (viz., broadband communications) as a public utility which is as essential to life as water, gas, and electricity. Please do NOT destroy our Democracy by catering to the vested lobbyists. Please side with The People, for The People, by reclassifying the Internet (viz., broadband communications) as a public utility IMMEDIATELY. Thank you.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Laura Jebe

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Henry Alvarez

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. If the FCC thinks the price of the fast lane paid by the likes of Comcast and Verizon won't be passed on to consumers, it has Commissioners that have s++t for brains. A "fast lane" is inherently anti-competitive both to consumers from a price standpoint and to organizations that have to access the net in order to bring products to market. Keep the internet completely free and open; no fast lane!

Sincerely,

James McClure

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Nancy Loewen

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Brian G Volk

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Robert Fulmer

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Shari Galve

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. As a small business owner, the end of net neutrality means the end of my business, which means I will no longer be able to provide for my family. How much money do corporations need? Is it so much that I must no longer feed my family? We're starving while CXOs move billions into offshore tax shelters. The country is crumbling at our feet and you and the government serve the only people rich enough to leave when this country collapses into chaos. Shame on you for even proposing this asinine rules. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Gregory Kummery

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Brett Taylor

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Jane Dzubak

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Sidne Baglini

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Gloria Key

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Joan Aston

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Brad Knopf

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Peter Bruce

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Michael Hale

In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. CHAIRMAN WHEELER, this is an issue of vital importance. Allowing a segregated internet could cause billions of dollars of economic damage. Many of us depend on the internet to do our jobs; if we are relegated to the "slow lanes" it could significantly reduce our wages. I get paid by how much work I produce per hour/day: a slow internet would seriously impact my earning ability. Please reclassify broadband internet access as a telecommunications service and RESTORE NET NEUTRALITY! Thank you.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Jason Pittman

Re: WC Docket No. 14-28 Comments

Why is it that everywhere we turn these days, Corporations and extremely wealthy individuals are trying to take complete control of our lives. Now the above mentioned want control of the internet. Talk about greed and if you allow it to happen you may just be killing the last vestiges of the American Dream. Sometime people have to be protected against themselves, and these corporations are a good example. In the long run they will lose. Just on cable and satellite tv I am being charged for that which once was free, What will the the to the internet bring. Think long and hard about this issue, if the planet survives how will you be remembered. As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Mary Hedblom

Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Pinar Ozsoy

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Katharine Heatherington

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Melinda Fisher

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

C. Crash Crashcup

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. As a small business owner, I want people to easily access my website. I do not believe that ISP's should have the ability to hurt small businesses by reducing speeds for consumers. The internet is a utility in this day and age and must be classified as one- which includes regulation. The internet should not be a profit zone for a handful of already powerful (and corrupt) corporations. It belongs to the people. Keep it that way. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Kimberly Martin-Mubasu

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

paul bennett

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Yvonne Roussel

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. As this in reality means slowing down the rest of us, and not speeding up fast lane for corporate use that already invests in such things. Already this is happening as you Mr. Wheeler made it clear that you will allow it. My connection has slowed 50% the weekend you announced your decision, and has occasionally come back to the speed I have contract and pay for!

Sincerely,

Thomas Steeg

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

derek yearwood

In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. Not only is this patently UNFAIR, but will separate us from the rest of the world, where the internet is equal for all, and put us further behind in innovation and development by small startups. And, make us the laughingstock of the developed world who makes the internet available for their all citizens.

Sincerely,

Vivian Donahue
